Forecast for Wednesday 13 Sep 2023

Weather: Quite a chilly start across the park with perhaps a few mist and isolated fog patches forming in the valleys during the early hours as cloud breaks up and skies clear. Mist/fog quickly clearing after sunrise to leave a dry day with sunny spells. Fair-weather cloud bubbling up in the afternoon but remaining dry. Remaining fine into the evening, but cloud thickening from the west overnight.

Chance of cloud-free hill tops above 600m: 70% to begin, quickly rising to 90% or higher by mid-morning.

Low cloud and visibility: Tuesday evening's cloud at 500m soon breaking through the early hours of Wednesday. A few ragged patches of cloud are possible around the height of highest summits in the first few hours after dawn as any early mist or fog lifts. Otherwise, cloud bases remaining above the summits. Very poor visibility in early mist or fog, otherwise very good.

Meteorologist's View

A nice day to be out on the hills.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 11 Sep 2023	0.8mm	2.4mm	2.4mm

Forecast for Thursday 14 Sep 2023

Weather: Skies clouding over through the morning. The cloud will be thickest in the west with a few outbreaks of rain possible, perhaps heavier later. Remaining drier towards the east of the park and a few hazy sunny spells may break through the cloud. Rain moving south during the evening.

Maximum wind: 20mph southwesterly winds on the summits during the morning, easing to 10mph by evening.

Chance of cloud-free hill tops above 600m: 80% to start, dropping by late-morning to 40% in the west and 60% in the east.

Low cloud and visibility: Cloud initially above the summits but lowering to 500m across the west of the park. Some patches at this level perhaps also making it further east, but generally lowering to 700m here. Very good visibility to begin, becoming moderate as cloud lowers and locally poor in any rain.

Temperature: **Valleys:** Plus 11 Celsius, rising to plus 17 Celsius.
At 600m: Plus 9 Celsius, rising to plus 12 Celsius.
Freezing level: Above the summits.
